About sending artwork to us

This book contains our most popular cutter templates including sizes etc for use when creating artwork for our fridge magnets.

When sending artwork to us, it must be sent in either AI, EPS, or PDF format, with all fonts converted to outlines.

All artwork must carry 1.5mm of bleed, unless it has a coloured or white border, in which case it must have 3mm of bleed.

If the artwork does not meet these specifications there will be a £30 artwork charge added.

Please state Pantone colours if required, on smaller orders there will be a charge for Pantone colour matching.

We can supply background artwork for some of our cutter shapes, if required. Please contact us for details of these.

Bespoke cutters are available, price on request, but be aware that we cannot create cutters with very intricate outlines. Please enquire if you would like more details.
